

What We Will Be Talking About

Some other MVTHS students, Matthew Harris, Zach Bertocci, Noah Gibson, and I hacked the MBTA Charlie Card System and responsibly disclosed it.

I cannot give too much information on it yet, but it will all be available during DEF CON, and I will release more after it. I can't spoil the surprise.

All the information that I am allowed to release about the talk is in this forum post.

What Is DEF CON

DEF CON is the largest cybersecurity conference in the world. It happens every year in Las Vegas and has been going on since 1993. I could talk more about it, but you can probably find that information by reading the Wikipedia page on it.
